

K6PV PVARC Repeater

The K6PV repeater is a dual mode repeater operating from the Palos Verdes Peninsula at 1240 feet above sea level. The repeater provides excellent coverage throughout the Los Angeles region.

Operating on a frequency of 447.120 MHz and a frequency split of -5.0 MHz, the repeater is configured to provide both analog FM and DMR.

K6PV is an open repeater available to all licensed amateurs to use and enjoy.

FM – K6PV

447.120 MHz (-), PL of 100 Hz, CTCSS

The PVARC weekly analog net takes place at 1930 hours, Pacific Time, each Tuesday evening on FM. This net also operates a cross band link on 144.910 MHz with a PL of 156.7 Hz to allow coverage to the western part of the Palos Verdes Peninsula from Point Vicente north to Malaga Cove. Visitors are always welcome.

FM – W6MTA

449.980 MHz (-), PL of 173.8 Hz, CTCSS

The W6MTA repeater, known to us as PV-WEST, has similar coverage to K6PV but may offer connectivity if reception from K6PV is spotty.

DMR – K6PV

447.120 MHz (-), talkgroup 31060, time slot 2, color code 1

K6PV is a member of the Brandmeister network allowing access to regional, state, national, and world wide talk groups.

The PVARC weekly DMR net begins at 1930 hours, Pacific Time, each Wednesday on the PVARC talk group 31060. Access the talk group direct from K6PV or anywhere in the world via Brandmeister. Visitors are always welcome.
